- Designed to help you better understand and manage your liver health

Easy access to information and support

Record your results and track your progress

Navigate in a range of languages

Get reminders for appointments and to take medications

Keep notes and questions in one place

“ For people living with viral hepatitis or other liver conditions, understanding and managing their healthcare can be challenging. Finding appropriate resources and information to support self-management can also be difficult. Tools such as the LiverWELL app can really help people keep track of their health care, get advice and information, and assist them to stay in control and stay healthy! ”

**Professor Benjamin Cowie, Royal Melbourne Hospital**

“ A diagnosis of hepatitis can be a situation where you feel you have little understanding or control. Having links to information and support as well as helpful tools on the LiverWELL app can help you manage your health status. Be empowered and informed in order to collaborate with your medical supports. ” **Andrée, Community member with lived experience**
