Laminating and cutting instructions

Laminating machine is available (on the table closest to the quiet rooms in the office).

The laminating machine must warm up (green light indicates that it is ready).

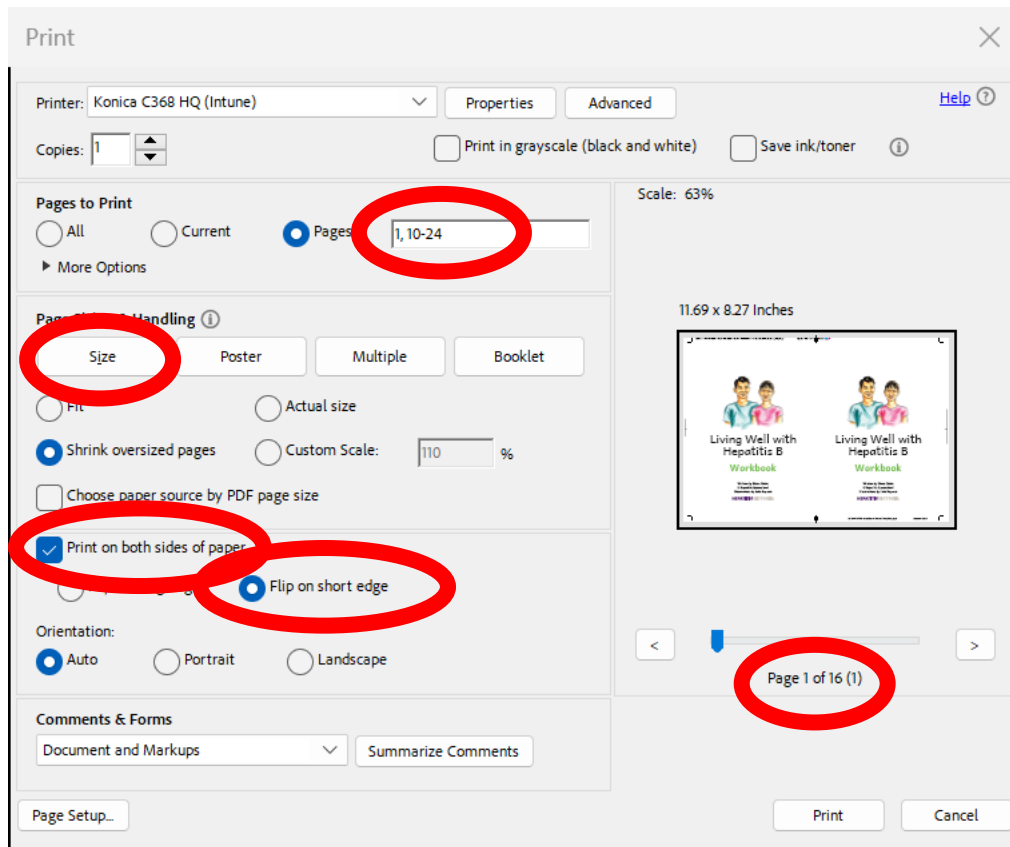

*For safety reasons, the machine will turn off to prevent overheating. Once this occurs, let the machine cool down for a few minutes, and restart the machine to resume laminating.

Cut the materials using the guillotine (not scissors) for more even and efficient cutting

*Caution must be exercised when using the device. Cutting must be done quick and swiftly, cutting slowly may cause the blade to get stuck mid-cutting.

For cutting the laminated activities – please cut the perimeter of the cards (so that there are no ‘white’ borders, or excess lamination). The lamination will still keep in tact despite cutting the paper area.
